

**RE: WASTE & RECYCLING EQUIPMENT**

Over the past 25+ years, we have been assisting architects, developers, and property management companies across North America in the design, installation and service of multi-family waste equipment – with thousands of installations to our credit including various LEED® certified properties.

We are **Vertical Waste Solutions LLC** – one of North America’s premier waste equipment manufacturing and service providers dedicated to high-rise residential buildings. Our team makes planning your next waste and recycling equipment project cost-effective and straightforward. Enjoy peace of mind knowing we can handle everything from **CHUTE TO FINISH**.

We pride ourselves on one of North America’s most experienced high-rise residential waste equipment and product and services company. Our expertise makes it easier for you to design and install the most efficient waste handling system for your project.

We provide residential projects with the latest waste and recycling equipment technology and apply our extensive experience during the building construction and installation process. Every residential building project presents unique challenges; our team provides expert advice and support to determine the best solutions for your application and overall project success.

VWS product lines include:

- Waste management reports and design assistance in order to achieve SPA approvals
- VWS3 and VWS2 recycling systems
- Garbage compactors
- Garbage and linen chutes
- All sizes of garbage, recycling and organics containers
- Garbage room air purification & HEPA systems
- Bin Buddy container mover systems
- Retrofits and new construction
- After-installation service

Our other services include architectural and site coordination, ensuring that the architect and developer has met and complied with any municipal requirements, in addition to plotting the equipment directly onto the project working drawings.

We work with many major property management companies across North America, ensuring a smooth transition from construction to occupancy, and providing ongoing waste equipment management and maintenance of the property. In fact, the owners personally supervise each and every installation.

We would welcome a call from your project team to discuss your upcoming property. We are proud to work with North America’s top architects, developers and general contractors, and we look forward to speaking with you soon to discuss your next project.

Sincerely,

*Jason Tower*
